In-Use Information

In-Use Information shows whether and how potentially conflicting trademarks are being used on the Web. We provide information, when available, on the citation, its owner and its use in commerce for up to 25 Group One citations per data source (USPTO, State, Common Law Database, Business Names and Gale Group Database). The search results included in this section are a selection of the information available at the time of the preparation of this search report, and are not a comprehensive representation of the Web. Any of the Web links included in your search report may become unavailable at any time following the preparations of this report.

Owner Matching

The Owner Matching feature is an index within the trademark record showing citations within the report with the same owner. Owner Matching is an alphabetical, word for word match. Inconsistencies in the data coming from providers (i.e., USPTO, State, etc.) may impact results.
